Response to Arguments

1. Applicant's arguments, filed 8/24/2007, with respect to Claims 1-28 have been fully considered and are persuasive. The rejections have been withdrawn.

Allowable Subject Matter

2. Claims 1-3, 10-12 are allowed.

3. The following is an examiner's statement of reasons for allowance: With respect to the prior art cited, it is well known in the art to have an option slot on a digital camera which can receive either a memory card or communication card in the same option slot. The closest prior art teaches a recording medium mounting/dismounting detection section which detects mounting of a recording medium, and can also detect mounting of a communication card. The prior art teaches other functions or processes performed when the type of card is identified such as different arrangement of I/O area for corresponding different types of cards. However, prior art fails to teach that when the detecting section detects a recording medium, image storing is performed, and when the detecting section detects a communication card, image storing to the file server is performed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fukuoka (US 6300976) teaches a digital image capturing device, which detects which type of card, is inserted and performs arrangement of I/O area accordingly.

Yamagishi (US 7221391) teaches a camera, which detects whether a recording medium is mounted, and can also detect a communication card mounted.

Seki (US 7154534) teaches one card in one slot, which includes a communication card and a memory card.
